

# STUDENT VERSION (DevOps-Week-6)

---

CLARUSWAY  
WAY TO REINVENT YOURSELF

## Meeting Agenda

---

- ▶ Icebreaking
- ▶ Questions
- ▶ Interview/Certification Questions
- ▶ Coding Challenge
- ▶ Article of the week
- ▶ Video of the week
- ▶ Retro meeting
- ▶ Case study / project

# Teamwork Schedule

---

## Ice-breaking

5m

- Personal Questions (Stay at home & Corona, Study Environment, Kids etc.)
- Any challenges (Classes, Coding, AWS, studying, etc.)
- Ask how they're studying, give personal advice.
- Remind that practice makes perfect.

## Team work

10m

- Ask what exactly each student does for the team, if they know each other, if they care for each other, if they follow and talk with each other etc.

## Ask Questions

15m

### 1. In which language Ansible modules are written?

- A. Ruby
- B. Java
- C. Python
- D. YAML

### 2. What language is an Ansible playbooks are written?

- A. HTML
- B. Python
- C. YAML
- D. JSON

### 3. Ansible uses agent/master architecture.

- A. True
- B. False

**4. Which of the following has highest priority for Ansible configuration settings?**

- A. ansible.cfg (in the current directory)
- B. .ansible.cfg (in the home directory)
- C. ANSIBLE\_CONFIG (an environment variable)
- D. /etc/ansible/ansible.cfg

**5. What is the following command do? (Ansible)**

```
- name: _____  
  yum:  
    name: httpd  
    state: absent
```

- A. Install the nginx package
- B. Remove the nginx package
- C. Remove the Apache package
- D. Install the Apache package
- E. Update the Apache package

**Interview/Certification Questions****20m****1. What are Ad-hoc commands?****2. What is "idempotency"?**

**3. You lead a team to develop a new online game application in AWS EC2. The application will have a large number of users globally. For a great user experience, this application requires very low network latency and jitter. If the network speed is not fast enough, you will lose customers. Which tool would you choose to improve the application performance? (Select TWO.)**

- A. AWS VPN
- B. AWS Global Accelerator
- C. Direct Connect
- D. API Gateway

**4. Which of the following is a correct statement in relation to ECS instances when accessing Amazon ECS service endpoint? Choose 2 options.**

- A.** Create an Interface VPC Endpoint for ECS service and attach to VPC subnet's route table in which ECS instances are running.
- B.** ECS instances are launched with ECS-optimized AMI which contains an inbuilt mechanism to communicate with ECS service endpoints through AWS network.
- C.** Create a NAT Gateway and attach it to VPC subnet's route table in which ECS instances are running.
- D.** AWS service endpoints are accessible internally across VPCs. You need to enable IAM role access on the service which needs to be accessed.

**5. You are working for an organization which is actively using AWS. They have noticed that few AWS ECS clusters are running and they do not know who and when the clusters are created. They tasked you to find out the logs regarding this. What will you do?**

- A.** Check CloudWatch event logs
- B.** Check CloudTrail logs.
- C.** Check CloudWatch metrics dashboard.
- D.** Check Trusted Advisor.

### Article of the Week

10m

- [Creating Adding And Authorizing Users and Groups For ssh Connection With Ansible](#)

### Video of the Week

10m

- [What is Ansible?](#)

### Retro Meeting on a personal and team level

10m

Ask the questions below:

- What went well?
- What could be improved?
- What will we commit to do better in the next week?

## Coding Challenge

5m

- [Cloning a Remote Repository Using Ansible Playbook](#)

## Case study/Project

10m

**Case study should be explained to the students during the weekly meeting and has to be completed in two week by the students. Students should work in small teams to complete the case study.**

- [Project-207: Web Page Application \(Postgresql-Nodejs-React\) deployed on EC2's with Ansible and Docker](#)

## Closing

5m

-Next week's plan

-QA Session

---
